From: Sheryl Flannagan

SUBJECT: Administrative Bylaws Update

Recommendation

RESOLVED THAT: the Board of Directors approve Staff Report No. 47-10-24-BOD regarding the Administrative Bylaws Update.

Purpose of the Staff Report

The purpose of this Staff Report is to receive approval to update the Administrative Bylaws for the Board of Directors.

Background

The Board of Directors approved the NVCA Administrative Bylaws August 24, 2018. There have been updates as required since then.

Issues/Analysis

Conservation Ontario (CO) provides a template for Administrative Bylaws to all conservation authorities. The NVCA follows this template. At their December Board meeting, CO had approved some minor changes to the template to reflect the new Ontario Regulation 402/22 which replaced Ontario Regulation 139/96. Attached are the proposed administrative bylaws with the changes marked with track changes.

Relevance to Authority Policy/Mandate

Good administrative bylaws are critical and essential for operating under the *Conservation Authorities Act*.

Impact on Authority Finances

Staff time to prepare this report is addressed in the 2024/25 budget.

Climate Change Implications

There are no climate change implications related to this report.

Appendix 2

Code of conduct

1. Background

Since its inception, the NVCA has demanded a high level of integrity and ethical conduct from its General Membership. The Authority's reputation has relied upon the good judgement of individual Members. A written Code of Conduct helps to ensure that all Members share a common basis for acceptable conduct. In addition, the General Membership has formalized a "Member Job Description" which includes standards to provide a reference guide and a supplement to legislative parameters within which Members must operate. Further, these documents enhance public confidence that Members operate from a base of integrity, justice and courtesy.

The Code of Conduct and Job Description are general standards. They augment the laws which govern the behaviour of Members, and they are not intended to replace personal ethics.

This Code of Conduct and Board Job Description will also assist Members in dealing with situations that may be ambiguous in NVCA resolutions, regulations, or policies and procedures. Additionally, the agricultural representative appointed by the Minister will be required to follow the provincial ethical framework set out for government public appointees in the Management Board of Cabinet's Agencies and Appointments Directive.

2. General

All Members, whether a municipal Councillor or an appointed representative of a municipality, or whether appointed by the Minister as a representative of the agricultural sector, are held in high esteem as representatives of the Nottawasaga Valley Conservation Authority and are expected to conduct themselves in a manner that reflects positively on the NVCA.

All Members shall serve in a conscientious and diligent manner. No Members shall use the influence of office for any purpose other than for the exercise of his/her official duties.

It is expected that Members adhere to a code of conduct that:

- i. Upholds the mandate, vision and mission of the Authority;
- ii. Considers the Authority's jurisdiction in its entirety, including their appointing municipality;
- iii. Respects and honors confidentiality;
- iv. Approaches all Authority issues with an open mind, with consideration for the organization as a whole;
- v. Exercises individual powers as a Member when acting in a meeting of the NVCA;
- vi. Respects the democratic process and supports and respects decisions of the General Membership and committees;
- vii. Declares any direct or indirect pecuniary and conflict of interests when one exists or may exist;

- viii. Conducts oneself in a manner which reflects respect and professional courtesy and does not use offensive language in or against the Authority or any Member or any Authority staff.

3. Gifts and Benefits

Members shall not accept fees, gifts or personal benefits that are connected directly or indirectly with the performance of duties.

4. Confidentiality

The Members shall be governed at all times by the provisions of the *Municipal Freedom and Information and Protection of Privacy Act*.

All information, documentation or deliberations received, reviewed, or taken in closed session of the Authority and its committees are confidential.

Members shall not disclose or release by any means to any member of the public either in verbal or written form any confidential information acquired by virtue of their office, except when required by law to do so.

Members shall not permit any persons other than those who are entitled thereto to have access to information which is confidential.

In the instance where a Member vacates their position on the General Membership they will continue to be bound by MFIPPA requirements.

Particular care should be exercised in releasing information such as the following:

- i. Human resources matters;
- ii. Information about suppliers provided for evaluation which might be useful to other suppliers;
- iii. Matters relating to the legal affairs of the Authority;
- iv. Information provided in confidence from an Aboriginal community, or a record that if released could reasonably be expected to prejudice the conduct of relations between an Aboriginal community and the Authority;
- v. Sources of complaints where the identity of the complainant is given in confidence;
- vi. Items under negotiation;
- vii. Schedules of prices in contract tenders;
- viii. Information deemed to be "personal information" under the *Municipal Freedom of Information and Protection of Privacy Act*

The list above is provided for example and is not exhaustive.

6. Work of a Political Nature

No Member shall use Authority facilities, services or property for his/her re-election campaign to any position or office within the Authority or otherwise.

7. Conduct at Authority Meetings

During meetings of the Authority, Members shall conduct themselves with decorum. Respect for deputations and for fellow Members requires that all Members show courtesy and not distract from the business of the Authority during presentations and when others have the floor.

8. Influence on Staff

Members shall be respectful of the fact that staff work for the Authority and are charged with making recommendations that reflect their professional expertise and corporate perspective, without undue influence.

9. Business Relations

No Members shall borrow money from any person who regularly does business with the Authority unless such person is an institution or company whose shares are publicly traded and who is regularly in the business of lending money.

No Member shall act as a paid agent before the Authority or a committee of the Authority, except in compliance with the terms of the *Municipal Conflict of Interest Act*.

10. Encouragement of Respect for Corporation and its Regulations

Members shall represent the Authority in a respectful way and encourage public respect for the Authority and its Regulations.

11. Harassment

It is the policy of the NVCA that all persons be treated fairly in the workplace in an environment free of discrimination and of personal and sexual harassment. Harassment of another Member, staff or any member of the public is misconduct. Members shall follow the Authority's Harassment Policy as approved.

Examples of harassment that will not be tolerated include: verbal or physical abuse, threats, derogatory remarks, jokes, innuendo or taunts related to an individual's race, religious beliefs, colour, gender, physical or mental disabilities, age, ancestry, place of origin, marital status, source of income, family status or sexual orientation. Member Job Description

In 2015, the Nottawasaga Valley Conservation Authority received a *Service Delivery and Operational Review*. Recommendation 19 of this report suggested a Board Action Plan to strengthen Authority governance around three components:

- i. General Membership role;
- ii. General Membership set up, size and representation; and
- iii. General Membership operation.

The consultant recommended that the Members adopt a Job Description covering the five key roles that the Board has specific responsibilities for:

- i. NVCA strategic direction and implementation;
- ii. Financial stewardship;
- iii. Governance;
- iv. Legislative compliance; and
- v. Representation of member municipalities.

Specifically, the Board has responsibility for:

Strategic Direction

- i. Formulating the NVCA's Strategic Plan – completing strategic visioning and long term planning;
- ii. Setting implementation priorities in an approved Business Plan;
- iii. Reviewing and approving NVCA policies.

Financial Stewardship

- ii. Approving the NVCA budget and NVCA Asset Management Plan;

Representing Member Municipalities

- i. Members are reasonably expected to attend meetings, training and other Authority functions. It is understood that from time to time conflicts will occur which may result in occasional absences.
- ii. Where possible Members are encouraged to attend social, cultural and special NVCA events and affairs. Representation at such events is important to staff and stakeholder groups we are involved with.
- iii. From time to time, Members may be requested to represent the Authority at upper tier of government events and other Agencies and Commissions' functions with the Chair, Vice Chair or delegated NVCA spokesperson.
- iv. Members shall accurately and adequately communicate the attitudes and decisions of the Authority, even if they don't agree with a decision reached on a particular matter showing respect for the democratic process; showing a sense of teamwork within the membership; and showing respect for the majority opinion of the Members.
- v. Nothing in this Job Description is intended to prevent a Member from outlining their rationale for voting in a particular manner, which may have been contrary to a final Board decision. When so doing, the members shall be cautious not to make disparaging, accusatory or negative comments which calls into question the collective good faith decision of the Board.

Governance

- i. Performing a Governance performance review on an annual basis.
- ii. Ensuring Committees are operating effectively.
- iii. Ensuring that Authority meetings are conducted in a professional, efficient and transparent manner – confidentiality is respected when required.

CONSERVATION AUTHORITY

Giving Tuesday is next Tuesday, Dec. 3.

The Nottawasaga Valley Conservation Authority (NVCA) is [accepting donations](#) to help restore local rivers and streams, maintain conservation areas, inspire youth to connect with nature and monitor the health of our local environment.

This year, NVCA’s environmental education team introduced French-language programming to schools and connected with students to protect water quality in local rivers and

streams. The stewardship team restored rivers and streams and created wetlands, while the lands team made NVCA’s conservation areas safer and more enjoyable for all users. The watershed monitoring team monitored the health of our streams and launched a pilot project to monitor the effects of climate change.

Funds raised from Giving Tuesday give opportunities for students to connect with nature, help students learn to connect with nature, and allow NVCA’s staff and volunteers to protect and restore local rivers and streams. More resources will be available for trail maintenance, and staff can continue to monitor streams, rivers, wetlands, forests and groundwater so residents can learn about their local environment.

“We have ambitious plans for 2025 to continue the great work our teams have been undertaking,” said Kyra Howes, director of conservation services at NVCA. “NVCA staff are very resourceful and have many years of experience in using donations as leverage to raise even more funding through grants and partnerships. Some programs can generate \$4 from every \$1 of donation through grants and other funding opportunities.”

Donations can be made [online through NVCA’s website](#), by cheque or by visiting [NVCA’s administration office](#). NVCA also welcomes volunteers to help plant trees, and restore rivers and streams, and is actively recruiting volunteers to help promote conservation areas and shape future events and festivals.

UPDATED: Due diligence not done on Poplar Village MZO: AG report

AG's report shows the developer had discussions with the province to finalize wording on the MZO without the town's involvement prior to the province approving it

December 4, 2024 by Jessica Owen

Collingwood Today

A version of this story was first published by [CollingwoodToday](#), a Village Media publication.

The provincial auditor general's report released on Tuesday says the province issued Minister's Zoning Orders (MZO) without doing their due diligence when requests come across their desks.

And, in a case study on Collingwood's Poplar Village project used in the report as an example, Collingwood's current council may have been right in asking the province to pump the brakes in 2022 on finalizing the MZO, although the report notes the province didn't heed that advice.

"It is well known how I felt about the early MZO process for the proposed Poplar Health and Wellness Village," said Mayor Yvonne Hamlin in a statement sent to *CollingwoodToday* in response to the report's findings.

A two-page case study in the [120-page report](#) completed by provincial auditor general Shelley Spence's office covers the Poplar Village project MZO timeline based on internal provincial government communications.

The Poplar Regional Health and Wellness Village proposal for 130 acres on the northeast corner of Poplar Sideroad and Raglan Street was first brought forward to Collingwood council in March 2022 by proponents Di Poce Management Ltd. and Live Work Learn Play Inc.

According to the initial vision for the project presented to council, there would be seven key areas incorporated into the design of the village, including a regional health and wellness campus, a market district, long-term care/assisted living facilities, bioscience and medical research facilities, an eco-wellness centre, a regional transit hub, student and workforce housing, and sports medicine clinics.

The developers intended to seek an MZO — a controversial provincial tool to fast-track a change of zoning on a piece of land with provincial authority bypassing the municipal zoning process — to change the zoning of the property from industrial to mixed-use to allow for the community hub-style development.

On Aug. 18, 2022, [council endorsed the MZO](#) "in principle," with the caveat that the developers must work with town staff, the mayor and deputy mayor and the Ministry of Municipal Affairs and Housing to prepare a final MZO for endorsement.

On Nov. 10, the previous council [voted in favour](#) of supporting the MZO application, even though a development agreement between the town and the developer had not yet been signed. It was one of the last major decisions of the 2018-2022 council before the newly elected council took their seats.

The decision didn't come without controversy, with then-new mayor Hamlin quickly calling a meeting of the newly inaugurated council [on Nov. 16](#) to revert to an "in-principle" endorsement of an MZO for the Poplar project until the town and the developer had a signed agreement in place to ensure that what the developer was promising is what would be built.

"I don't feel this was handled in an open and transparent fashion, which is going to be the hallmark of how I govern this town," said Hamlin at the time of her intention to hit the brakes.

But it was too late.

An MZO for the project had already been drafted by the Ministry of Municipal Affairs and Housing as of Oct. 31, 2022, according to the province's internal documentation referred to in the auditor general's report.

"Then, on Nov. 14, 2022, Ministry staff received an email from the Deputy Minister's office stating that the direction from the Premier's Office was to move forward on the Collingwood MZO immediately," notes Spence in the report.

She writes that although the town had requested a minimum of 10 per cent of the new housing units be a mix of affordable and attainable housing, the final version of the MZO has no wording to that effect.

"Staff noted in the accompanying MZO information package to the Minister: 'in order to meet desired timelines, the Ministry and (Legislative) Counsel were unable to complete the normal due diligence. As a result, there may be errors that result in the MZO not achieving the intended outcomes and a need to amend this MZO post-filing,'" reads the AG report.

The Ministry of Municipal Affairs and Housing approved the MZO application on Nov. 16, the same day Collingwood council had voted to press pause. It was announced publicly on Nov. 17 — merely one week after Collingwood council had voted to endorse it.

Spence notes the Poplar Village proposal will require significant upgrades to municipal servicing capacity before becoming a reality through the expansion of the Raymond A. Barker Water Treatment Plant. She concluded that the town was not asked whether it was still supportive of the MZO without the affordable housing component before it was approved by the province.

It is one of three examples in the report of MZOs where municipalities asked for affordable housing to be included as a condition of supporting an MZO application, however the province did not include it in the final approved MZO.

In December 2023 — more than one year later — shortly after the town finally [signed a development agreement](#) with the developer which included the 10 per cent affordable/attainable housing number, the province announced the Poplar MZO was among 14 projects across Ontario marked for [enhanced monitoring](#) due to limited progress.

Spence points out in her report that the proponents behind the Poplar Village project suggested their proposal includes the creation of about 16,000 construction jobs and between 3,500 and 6,500 permanent jobs.

“No evidence or due diligence were completed or provided to or by the Ministry to substantiate these claims,” she wrote, adding that a 2023 labour report by the town done in 2023 noted that 13,757 people are estimated to be in the town’s labour force.

“Ministry staff did not report to the Minister’s Office on whether the proponent’s claims appeared unrealistic, given the potential impact on the size of the labour force,” she wrote.

No go, MZOs

The annual auditor general’s report covered nine performance audits on various topics, including [the Ontario Place redevelopment](#), the [implementation and oversight of the province’s opioid strategy](#) and [safety, and financial management and capital at the Toronto District School Board](#).

The audit on MZOs examined whether MZOs were being made based on

timely and complete information and in accordance with the Planning Act and whether mechanisms had been established to measure whether MZOs were achieving their intended objectives.

It found that while unleashing an unprecedented number of municipality-overriding zoning orders, Premier Doug Ford’s government tended to ignore vital information and prioritize requests “with no protocol and no apparent rationale.”

[Read more about the AG's MZO report here.](#)

Where does the project stand?

According to [an update](#) on the project provided by Armando Lopes, vice-president of development for Di Poce Management Ltd. to *CollingwoodToday* in October, the vision for the project is currently still in-line with what was presented to the public in 2022.

Work is continuing by Di Poce Management Ltd. to hammer out an agreement with Collingwood General and Marine Hospital to finalize details on the land donation as part of the development for a future hospital build on the Poplar site.

In the AG’s report, she notes the Ministry of Environment, Conservation and Parks informed the MMAH during their review of the MZO that the site is a potential habitat for endangered or threatened species such as butternut trees, barn swallow, bobolink, chimney swift and the eastern meadowlark.

Lopes said in October that ecologists have been at the 130-acre site, along with officials from the Nottawasaga Valley Conservation Authority, to delineate where the sensitive natural environmental areas exist.

Provincial monitoring of the Poplar Village MZO is still underway, and the projects on that monitoring list are planned to be tracked until mid-2025.

Hamlin said on Tuesday she's optimistic about the project moving forward.

"We have successfully concluded an agreement with the developer containing significant community benefits including the land for a new regional hospital on Poplar Sideroad," she said. "I look forward to continuing to work with the ministry, the developer and the hospital as this project moves forward."

In an emailed statement, Lopes provided the perspective of Di Poce Management Ltd. on the AG report.

"We are disappointed in the way our MZO was characterized," said Lopes. "Unfortunately, the auditors made no attempt to contact us to obtain accurate information available on the town's website regarding the request process for an MZO to implement the Poplar Regional Health and Wellness Village."

Lopes takes issue with the auditor making no mention in the report of the fully integrated regional campus for Collingwood General and Marine Hospital, the health-care-related jobs and economic growth that would come with that part of the project. He was

dismayed to find there was also no mention of the extensive yearlong [public consultation process](#) the developer undertook in Collingwood prior to the MZO being approved.

He said he was surprised to see the focus in the report on the environmental impacts as if they hadn't been considered.

"(It) failed to note that the lands were designated and zoned for industrial uses already and that the site is largely outside of the area regulated by the Nottawasaga Valley Conservation Authority," he said. "Any portions of land which were identified as environmental protection in the in-effect zoning were directly transferred to the MZO as environmental protection areas accordingly."

Lopes also notes that while the MZO has been approved, that doesn't circumvent the rest of the planning process, and the developer has worked to come to the development agreement in place with the town. He said the developer will continue to work with all levels of government and the Nottawasaga Valley Conservation Authority on the project.

He points out that as a matter of law, MZOs do not include affordable or attainable housing requirements, so he's unsure why there was such an emphasis on that aspect on multiple projects considered in the AG's report, and reiterated that the 10 per cent affordable/attainable housing promise is included in the development agreement.

"Overall, we are proud of all the hard work and effort by all parties and believe this MZO will transform the community and region for generations to come," said Lopes.

CONSERVATION AUTHORITY

The Nottawasaga Valley Conservation Authority (NVCA) is inviting community members with a passion for nature to join its new Conservation Areas Engagement Working Group.

This exciting opportunity is perfect for those who want to roll up their sleeves, share creative ideas, and help shape the future of the region's most beloved natural spaces.

The NVCA's 11 conservation areas offer many opportunities for visitors to connect with nature. Visitors can enjoy self-guided activities such as hiking, snowshoeing, canoeing and fishing. "This isn't your typical committee," said Elise Barr-Klouman, community engagement facilitator at NVCA. "We are looking for volunteers who are passionate about protecting nature, connecting with others, and creating lasting change to join us. The group will play a key role in supporting NVCA's fundraising efforts and increasing public awareness about the importance of natural spaces."

The new working group will focus on increasing the profile of these conservation areas, starting with Fort Willow Conservation Area and Tiffin Centre for Conservation, and potentially extending to other locations like Edenvale, Minesing Wetlands, Nottawasaga Bluffs and Petun conservation areas.

With a special focus on shaping future events at Fort Willow Conservation Area, members will explore innovative programming ideas, work with heritage and community partners, pursue sponsorship opportunities and support funding initiatives to expand the event's reach and impact.

Members will meet quarterly or more often during key planning periods. This volunteer opportunity offers plenty of flexibility for members to lead individual projects or assist at

events. Don't miss out on the chance to leave a legacy in the natural spaces that make our region special.

Are you ready to make a difference? Applications are open until Jan. 3, 2025, and selected candidates may be invited for an interview.

NVCA Warns of Dangerous Waterways

December 21, 2024 by Phil DeLand

Conservation authorities are telling people to exercise caution around waterways this holiday season.

A release from the Nottawasaga Valley Conservation Authority says keep family and pets away from the edges of all waterways and water bodies.

They say streams, rivers, ponds and lakes are extremely dangerous at this time of year as streambanks are slippery and unstable and the water is cold.

Although temperatures have dropped since November when it was warmer, the area could see some free-thaw cycles to end the month.

The melted ice and snow can cause higher water levels, faster flowing water in waterways, potentially creating very hazardous conditions.

Beware of 'unstable' winter hazards along local water bodies: LSRCA

Lake Simcoe Region Conservation Authority offers safety tips for the season

NEWS RELEASE
LAKE SIMCOE REGION
CONSERVATION AUTHORITY

Lake Simcoe Region Conservation Authority reminds watershed residents to be prepared for winter hazards, particularly around bodies of water.

The conservation authority advises everyone to exercise caution and keep family and pets away from edges of all water bodies.

Hazardous conditions on and around bodies of water

Frequent freeze-thaw cycles can create hazardous conditions by increasing runoff and contributing to higher water levels and faster flows in

local watercourses. Accumulated snow and ice will also melt and refreeze, causing slippery and unstable areas around water. Slippery banks, high water levels, and fast-flowing cold water can lead to very hazardous and dangerous conditions.

Winter hazards are not limited to natural shorelines and riverbanks. Stormwater ponds, while seemingly inviting for skating, are dangerous. These ponds are designed to collect stormwater runoff from the surrounding neighbourhood and have water flowing in and out of them year-round. Road salt and other pollutants also collect in these ponds, further weakening any ice that forms. Because of these functions, the ice formed on the surface is extremely unstable and should never be used for recreational purposes.

Enjoy the outdoors – safely

Despite these hazards, you can still enjoy the outdoors this time of the year. At conservation areas and municipal parks, official trails have been created with your safety in mind. Use these trails and spend time outdoors safely.

To minimize risks while enjoying winter weather, the conservation authority reminds the community to follow these safety tips:

- Stay on the official trails at Ontario’s conservation areas to enjoy the outdoors safely.
- Keep family members and pets away from riverbanks and edges of all water bodies.

- Do not attempt to drive or walk on iced-covered water bodies. Always obey any posted safety signs.
 - Avoid all recreational activities in or around water, especially near ice jams or ice-covered water bodies, unless at an officially designated municipal facility.
 - Never use stormwater ponds for ice skating or any other activity. Water levels on these ponds can change due to road salt, snow melting, and changing temperatures causing cracks and dangerously thin ice.
 - Rescuing another person or a pet from ice is dangerous. If you see anyone that has fallen through the ice, call 911 for help immediately.

Select trails maintained year-round

Everything from geocaching to snowshoeing available.

A family of winter birdwatchers on the trails of the Tiffin Conservation Area.

While the snowy weather has set in across the land, the [Nottawasaga Valley Conservation Authority](#) (NVCA) still has plenty of winter activities to enjoy.

Here are five fun things to do during the wintertime at NVCA conservation areas:

Hiking at Nottawasaga Bluffs

The [Nottawasaga Bluffs Conservation Area](#) promises views of some breathtaking vistas, while only the main trail is seasonally accessible. The trail is suitable for hiking as well as snowshoeing, but is not maintained for skiing or cycling.

Snowshoeing at Fort Willow

A half-kilometre trail will take you into the heart of [historic Fort Willow](#), where you may be able to see the outline of the fort's former buildings, which served as a supply depot during the war of 1812. Three snowshoeing trails, ranging in length from 500 metres to 1.5 km, can be found at the NVCA's Minesing Wetlands Conservation Area.

Geocaching

Participate in a treasure hunt at most NVCA conservation areas, with caches hidden in areas available in the wintertime. The NVCA encourages folks to download the geocaching app, but asks that anyone wishing to place a new cache [request permission via email](#) first. Some caches contain small items, so if you take something, remember to replace it with something of equal value.

Plenty of fun for the wee ones

The NVCA offers several winter programs for children in the toddler to 10-year-old age range, and that includes the [Tiffin Nature School](#). Kids aged 2.5 to 10 can explore and connect with nature, through what the NVCA calls an immersive outdoor experience. Half day and full day programs are available on Tuesday and Thursdays from Sept. 3 — May 29, 2025.

Take a virtual field trip

Sure, getting out and about in wintertime can be fun and exhilarating, but sometimes staying cosy and warm at home is a great choice too. But you're still able to enjoy some of what the NVCA has to

offer. Visit the NVCA's website to enjoy virtual field trips to [Lake Huron and the Georgian Bay shoreline](#), or [dive into history at Fort Willow](#).

These Ontario bluffs have breathtaking vistas of the surrounding countryside

December 27, 2024 by Karen Doradea

Nottawasaga Bluffs Conservation Area is a treasure of natural beauty, home to sweeping vistas and rocky trails.

Spanning 400 acres, this park is the perfect spot for a day of adventure, whether you're a hiking enthusiast or just looking for a peaceful escape.

According to the [Nottawasaga Valley Conservation Authority](#), you'll get to step back in time as you wander the trails and see where "settlers once toiled to cut a living out of the wilderness."

Timber and limestone industries actually helped shape nearby communities like Singhampton and Glen Huron, too. The region is just bustling in history.

What can you do at Nottawasaga Bluffs Conservation Area?

Trail lovers, rejoice! This conservation area connects to the iconic Bruce Trail, with side trails like the Betty Carter and Ian Lang Memorial Trails offering plenty to explore.

The Key Hole Side Trail is a must-see too. Its dramatic crevices even hold onto patches of snow well into June.

But for the views, trek down the main trail from the parking lot to get access to the lookout which is seasonally accessible, depending on weather.

It's important to note that all [other trails](#) are not considered accessible due to inclines and uneven surfaces, according to the conservation area.

But when the snow takes over its trails, they become suitable for hiking and snowshoeing but are not maintained for skiing or cycling – so be wary.

Recent upgrades make your visit even smoother. The brand-new parking lot on the south side of 15/16th Sideroad is a game-changer, featuring a seasonal washroom building and a convenient trailhead to the Ian Lang Memorial Trail.

But a heads-up: those washrooms are closed for the winter, and overnight parking and camping are a no-go here.

COLUMN: Submit permit applications early to avoid delays

'Early submission of permit applications allows us to work together to address any concerns, giving your project the best chance of success,' says NVCA official

As we ring in 2025, we also welcome the arrival of the new construction season.

While most people won't be breaking ground until the spring, the Nottawasaga Valley Conservation Authority (NVCA) recommends you plan ahead to ensure approvals are in place before construction season begins.

At the NVCA, we're committed to promoting and regulating responsible development across our watershed. With more than 450 permit applications received in 2024, we're

proud to have worked with landowners to provide approvals with prescribed timelines 99 per cent of the time since April 1, 2024. However, the key to a smooth and timely approval process lies in one critical step: submitting your complete permit application early to avoid potential construction delays.

Planning a construction project involves many moving parts. Requesting a pre-consultation meeting in advance of submitting your formal application will inform whether any studies may be required and confirm submission requirements to ensure NVCA staff have what they need to complete their review. Complex projects may require input from other professionals, such as engineers or environmental consultants. While the NVCA maintains strict timeframes for how quickly permit applications must be processed and approved or denied, those regulations don't account for time spent waiting after we've requested additional information. Being prepared with all necessary documentation can significantly streamline the process, and getting in early allows buffer time if clarification is required. A proactive approach will keep your project timeline on track and minimize unexpected delays.

Permit applications can take up to three weeks to process and up to 90 days to approve, depending on the complexity of your project. Once approved, permits are typically valid for 24 months. If more time is required, applicants can extend their valid permit once for an additional 24 months, giving them plenty of time to complete their projects.

Our team at the NVCA is here to guide you through the permit process, ensuring your project is safe and sustainable, making our watershed more resilient to flooding and other natural hazards. Early submission of permit applications allows us to work together to address any concerns, giving your project the best chance of success.

By submitting your application early, you're not just helping us meet our timelines — you're setting yourself up for a smooth and successful project. With our expertise and your proactive approach, we can make faster approvals a reality.

Start your application today, and let's work together to build a better future for the Nottawasaga watershed.

At the NVCA, we're committed to promoting and regulating responsible development across our watershed. With more than 450 permit applications received in 2024, we're

proud to have worked with landowners to provide approvals with prescribed timelines 99 per cent of the time since April 1, 2024. However, the key to a smooth and timely approval process lies in one critical step: submitting your complete permit application early to avoid potential construction delays.

Planning a construction project involves many moving parts. Requesting a pre-consultation meeting in advance of submitting your formal application will inform whether any studies may be required and confirm submission requirements to ensure NVCA staff have what they need to complete their review. Complex projects may require input from other professionals, such as engineers or environmental consultants. While the NVCA maintains strict timeframes for how quickly permit applications must be processed and approved or denied, those regulations don't account for time spent waiting after we've requested additional information. Being prepared with all necessary documentation can significantly streamline the process, and getting in early allows buffer time if clarification is required. A proactive approach will keep your project timeline on track and minimize unexpected delays.

Permit applications can take up to three weeks to process and up to 90 days to approve, depending on the complexity of your project. Once approved, permits are typically valid for 24 months. If more time is required, applicants can extend their valid permit once for an additional 24 months, giving them plenty of time to complete their projects.

Our team at the NVCA is here to guide you through the permit process, ensuring your project is safe and sustainable, making our watershed more resilient to flooding and other natural hazards. Early submission of permit applications allows us to work together to address any concerns, giving your project the best chance of success.

By submitting your application early, you're not just helping us meet our timelines — you're setting yourself up for a smooth and successful project. With our expertise and your proactive approach, we can make faster approvals a reality.

Start your application today, and let's work together to build a better future for the Nottawasaga watershed.

While most people won't be breaking ground until the spring, the Nottawasaga Valley Conservation Authority (NVCA) recommends you plan ahead to ensure approvals are in place before construction season begins.

Take Care Near Bodies of Water

January 6, 2025 by Adrienne Proceviat

FM92 South Simcoe

The Nottawasaga Valley Conservation Authority advises that Ministry of Natural Resources has issued a Provincial Watershed Conditions Statement covering the watershed.

A cold front is moving slowly south across the province of Ontario.

It is bringing cold, sub-zero, temperatures and sustained winds to southern Lake Superior coast and southern Ontario and continuing into this week.

Day time temperature highs are forecast to remain anywhere from -5°C to -15°C.

Frazil ice is currently forming in some areas of Ontario.

Stream levels and flows are still elevated in areas that experienced warm temperatures, snowmelt and rain last week; however, the cold snap and forecast cold weather conditions are ideal for the formation of frazil ice on open water approaching zero degrees.

Lack of ice cover and exposure of the water surface to cold temperatures and/or wind chills below -18°C can trigger the formation of frazil ice.

Frazil ice can accumulate quickly on bridge abutments, piers, and riverbanks.

Consequently, water levels can rise quickly upstream of areas susceptible to frazil, or anchor ice constrictions,

and may lead to localized high-water conditions or flooding in vulnerable areas.

Please exercise caution around all bodies of water.

The public and especially children are advised to stay away from all watercourses, bridges, culverts and dams.

Alert any children under your care of these dangers and supervise their activities.

Please avoid driving through flooded roadways.

NVCA issues winter waterway safety warning

January 9, 2025 by Brian Lockhart

Hamilton Spectator

The recent snowfall and thawing from mild weather have created an increased hazard near local waterways.

The Nottawasaga Valley Conservation Authority (NVCA) has issued a warning to exercise caution near all waterways.

The NVCA is urging residents and visitors to exercise caution and keep family and pets away from the edges of all waterways and water bodies. Streams, rivers, ponds, and lakes are extremely dangerous at this time of year as streambanks are slippery and unstable, and the water is cold.

As the region is experiencing periodic freeze-thaw cycles, this is causing recurrent melting of accumulated snow and ice cover. The melted ice and snow cause higher water levels and faster-flowing water in waterways, potentially creating very hazardous conditions.

To keep safe, keep family and pets away from all bodies of water and avoid all recreational activities in or around water.

Only use trails at your local parks and conservation areas for winter outdoor activities, and only when they are maintained.

Follow staff instructions and signage throughout NVCA conservation areas.
